Caller Display – Free

Caller Display lets you see the number that's calling, so you can choose whether or not to answer the call. Please note, this feature will only display the number if the equipment/telephone handset is display compatible.

Call Sign – Cost: 82p/month

Call Sign gives you an extra number with a different ring tone so you know who the call is intended for, and can make sure the right person answers the phone.

Please note, this feature is subject to availability and whether multiple numbers are available at the exchange.

Using the Call Features

Your Phone

You will need a fixed line phone with  and  keys that make musical tones when you dial. If you hear clicks instead of tones, check the dial setting switch which is usually on the side or base of the telephone.

PIN Security

Some telephones store or display numbers as you dial. If you're worried about your PIN, you should use a different phone that does not store numbers. Alternatively, when your call is over, you should lift the handset and press a few random numbers to clear the memory.

Please be aware that some phones in hotels and businesses log calls, and phones on some networks can print PINs on itemised phone bills. Be careful that no one is able to see when you dial using a display phone.
